

# Effective Planning and Scheduling

As project managers and leads, we all know how difficult it can be to accurately determine the duration of a project, yet that is exactly what is expected of us on a regular basis. This workshop will not disclose the secret of creating an accurate schedule, because there isn't one. However, it will provide the factors and fundamental elements that you should consider and address when creating any type of schedule.

Participants should complete the Intermediate Project Management workshop prior to this course, or have equivalent knowledge.
